

TRIPU83 Assembly Instructions

- Remove all contents from the portable case.
- Lay frame flat on the ground.
- Expand frame upwards.

- Once frame is fully expanded, link magnetic connectors together.
- Shape frame into a triangle.
- Connect magnetic bars to frame.

- Mount lights at the intersection of two horizontal bars.
- Attach Velcro panels starting at the top of the frame.
- Use locating tabs to align paneling.
- Once all panels are attached, smooth seams over

The portable case transforms into a display counter in 1 to 2 minutes. Simply take the last Velcro® fabric panel and wrap it around the case. The fabric panel snaps into position once fully wrapped around the unit. Then align the grooves on the bottom of the counter with the grooves on the top of the case.

PLEASE NOTE:

- Do not use, store and transport the fabric panels in high temperature 40 °C
- Do not set up the fabric panels under the sunlight directly for a long time.
- Do not have a floodlight directed at the fabric panels ***closely*** for a long time.
- When storing the fabric panels, do not store them with any heat conducting material.
- Prior to storing lights, make sure they are completely cooled.
