**2TCASE - Display Case**

*** 2 People are needed for assembly***

**Step 1:** Remove all pieces from black travel case

**Step 2: Needed:** Front & back panels with black feet.
Have (1) person hold the panels on edge parallel to each other (as shown)

**Step 3: Needed:** (2) Side panels with extended corner extrusion (not the side panels with the washer & screw)
Have 2nd person slide the panels in (as shown)

**Step 4:** Use the included allen key to tighten the (4) screws inside the legs of the side panels

**Step 5:** Using (2) people, stand the bottom case assembly upright & set aside

**Step 6: Needed:** Wooden floor panel
With the unit upright, open the door & insert the wooden floor panel by pushing it down in the base until it is fully seated in the extrusion. The wooden floor panel is pressure-fitted into the unit, so extra force may be required to properly place panel in the unit

**Note:** The wooden floor panel is the panel with all the hardware attached on the underside. Remove all hardware from the panel before assembly

**Step 7:** Assemble the bottom by putting together the (3) non-door panels - then slide in the light panel and slide on the door

**Step 8:** Using (2) people, stand the top case assembly upright

**Very Important:** The top case assembly must be picked up by the front & back panels. The side panels of the top case assembly are not secured & will slide out of the unit if not picked up properly. Highly recommended to see our assembly video online under the SKU: 2TCASESLVS & 2TCASESBLKL
**2TCASE - Display Case**

*** 2 People are needed for assembly***

**Step 9:** Connect all wires on top of the case. After completing the wire assembly, place the top cover over the wires. Make sure all wires are pushed down & in so that the top over is properly seated on the unit.

**Step 10:** Using (2) people, carefully pick up the top case assembly. The (4) male connector rods on the bottom of the top case assembly should fully sit inside the extrusion on the bottom case assembly.

**Very Important:** The top case assembly must be picked up by the front & back panels. The side panels of the top case assembly are not secured & will slide out of the unit if not picked up properly. Highly recommended to see our assembly video online under the SKU: 2TCASESLVS & 2TCASESBLKL.

**Step 11:** With all doors open on both the top & bottom cases, proceed to connect the wiring from the bottom case to the wiring on the top case.

**Step 12:** Connect all side bulbs

**Step 13:** Insert rubber pieces into the metal shelf holders

**Step 14:** Place all shelves in (frosted shelf goes in base of top unit)

**Step 15:** Plug in
