

Battery Operated Scrolling Banner

1. Take out all the parts of the frame from the aluminum case.

1.

2. Pivot the stabilizing feet outwards.

2.

3. Insert the two vertical support bars into the holes in the base.

3.

4. Take out the rolled banner from the cardboard tube.

4.

5. Feed the top roller into the looped banner.

5.

6. Insert the top roller into the two vertical support bars and snap into place.

6.

7. Unroll the banner.

7.

8. Insert the middle support bar into the looped banner.

8.

9. Secure the bar into place by pushing in the levers at both ends of the bar.

9.

10. Loosen the adjustable knobs on the vertical support bars.

10.

11. Expand the frame upwards.

11.

12. Tighten the knobs on the vertical support bars. Two people are needed.

12.

13. Insert the bottom roller into the looped banner.

13.

14. Connect the plug on the roller to the plug in the base.

14.

15. Make sure wire is inserted into the indent on the end of the roller. Tuck wires underneath roller and place roller into the base.

15.

16. Plug the battery in underneath the base and press the red button to power "on."

16.

17. Your Battery Operated Scrolling Banner Stand is assembled.

17.
