

How to Clean Chalkboards

These wall-mount chalkboards and chalk board a-frames are part of our "Deluxe Series" of chalk board products, and feature a unique writing surface. The board's surface is ideal for use with wet-erase markers and liquid chalk markers. The board's surface is slightly textured, which makes cleaning the boards *slightly* more time consuming. As the board is designed to be "wet-erase", we recommend the use of a **melamine foam sponge** (better known as Mr. Clean® Magic Eraser, Scotch Brite™ Easy Eraser, or

Coralite® Ultimate Sponge) along with water and paper towels for cleaning the boards. It may take a couple times going over the board to fully remove the markings.
