

# CNTRTRS3X Assembly Instructions

To set-up your trade show stand, first remove all components from the travel case.

Remove each shelf and base from their protective bags.

After each part is out of the travel case, you're ready to start assembly of your trade show stand & counter.

First, place a base on the ground, feet side down and get one of the (2) truss supports.

Extend out the truss support, and line up the (6) screw tips with each hole on the base. Make sure the end with screw tips out when collapsed are facing up.

Twist each rod to screw the truss supports into place.

Repeat the previous steps and extend the other support and line up the screw-tips with corresponding holes.

Again, tighten each support by twisting the support rod.

Next, use the middle counter to properly line up the top screw-tips of each base with the (4) holes on the bottom of the counter.

Twist the upper portion of each support rod to stabilize the stand.

Attach one of the end shelves and tighten the support rods.

Attach the final shelf portion and tighten the support rods.

Ensure all of the rods for the bases & counter-top are tightened.

The trade show stand is complete.

To turn the travel case into a counter, take the black Velcro wrap, line up one side on the Velcro strip on the travel case and wrap around the case.

Next, unfold the included counter-top and line up the groove on the bottom of the counter with the ridges on the top of the travel case.

Your trade show stand & portable counter are now ready for use!
