

Convertible Table Cover Setup Instructions

Your table throw is designed to drape over a 5', 6' or an 8' table, depending on which size you buy.

To convert your table throw to fit a smaller sized table, see the instructions below.

At the bottom front corner of the table throw you will find a piece of Velcro sewn onto the fabric. Holding the Velcro attachment, fold the corners around towards the back, stretching the fabric tightly around your table. Attach the Velcro to the back as shown above.

Next, find the Velcro attachment at the bottom backside corner of the throw, and lift the fabric to locate the corresponding Velcro attachment underneath. Use the Velcro to attach and hide the excess fabric under the table.

Your table throw will now look like a fitted table cover designed to fit smaller tables!
