

Food Dispenser Stand Assembly Instructions

Take the locking strip and buffet stand, and get ready to make your store fixture.

Peel the paper off the adhesive portion of the locking strip.

Now place the adhesive portion on the back edge of the stand, making sure that the open portion of the locking strip is facing in.

Push the locking strip firmly to the surface.

Take your gravity dispenser and tilt the front end upwards so that the back portion fits into the opening of the locking strip.

Now just move the gravity dispenser to the desired location. Put other gravity dispensers on the same way.

This close up picture demonstrates how the back of the gravity dispenser fits snugly into the locking strip.

The display is ready for use.
