

Software Download and Installation

Begin by downloading and installing the Management Console on your desktop computer. The Management Console is the interface you will use to update and monitor your digital display(s).

After installation you will be asked to register the software. Fill out the form and enter the serial number from this card.

Then download the player software directly onto the Android player using the web browser on that device.

The download is on the www.bestwave.com > DisplayIt!Xpress product page. Select **Android Player Software** from the pop-up menu, and click "Download."

If you do not have Internet access or require a USB, please contact Best Wave Technical Support (support@bestwave.com) to request a software USB. There is a fee of \$30 plus shipping for this service.

Do not misplace this card. Serial numbers are required for each software license. Software cannot be activated on a permanent basis without a valid serial number.

There are additional resources available to assist in the use of this software. Watch the **DisplayIt!Xpress** tutorial for an overview of how the software works. The User Guide is also a valuable resource.

For installation assistance, contact Best Wave Technical Support from 9 AM - 5 PM (09:00-17:00) Mountain Standard Time (GMT -7) support@bestwave.com or (+1 480-368-8900 ext. 2).

Thank you for selecting Best Wave's **DisplayIt!Xpress** from Displays2Go for your digital signage requirements!
