**FLAT BASE TV STAND**

**Parts**

A. Instructions 1
B. Metal Base 1
C1. Lower Round Tube (Left) 1
C2. Lower Round Tube (Right) 1
D1. Upper Round Tube (Left) 1
D2. Upper Round Tube (Right) 1
E. Tube Connector 2
F. Pan Head Screw 12

*Hex Key for Part F can be found inside the TV Bracket box (DUOPOLEBK)*

**PLEASE READ AND UNDERSTAND ALL INSTRUCTIONS BEFORE START THE ASSEMBLING.**

1. Open small box, lay out 4 long Tubes (C1, C2, D1, D2) on a flat surface. See picture below to identify where each tube goes to (upper or lower, left or right).

**CAUTION:**

1. METAL BASE IS HEAVY! AT LEAST 2 PEOPLE SHOULD LIFT/MOVE TO PREVENT ANY PHYSICAL INJURY FROM MISHANDLING.
2. ALWAYS PLACE THE UNIT ON A HARD, FLAT SURFACE. DO NOT PLACE THE UNIT IN WHERE IT MAY BE IMPACTED OR MOVED. FAILURE TO DO SO COULD CAUSE SEVERE BODILY INJURY.

**DISPLAYS2GO**

55 Broadcommon Road Bristol, RI 02809, USA Phone: 1-800-572-2194 1-401-247-0333 (Int'l) Fax: 1-401-247-0392
2 Before assembling, remove packing materials. Carefully place the Metal Base (Part B) on a hard, flat ground.

Insert Lower Tube into the upright on the Metal Base.

Ensure slot cutouts on uprights and Lower Tubes align with each other.

3 Fix Lower Tubes by tightening 4 screws at bottom of the TV Stand.

Tighten 4 Screws (Part F) against the surface of lower poles with hex key.

Fix Lower Tubes by tightening 4 screws at bottom of the TV Stand.

ALL SCREWS MUST BE SECURELY TIGHTENED BEFORE USING TV STAND.

4 Fix Tube Connector (Part E) on top of the Lower Tube.

Insert Tube Connectors (Part E) into the Fixed Lower Tubes. Hold it in place when lining up holes. (Align with the top holes on Lower Tubes)

Insert 4 Screws (Part F) through Lower Tubes into Connectors. Fasten screws with hex key.

5 Insert Upper Tubes with Connectors.

Ensure the 2 slot cutouts are facing the same direction as other cutouts on the Lower Tubes.

Insert Upper Tubes (Part D) into Tube Connectors from above. The holes should line up with the holes on Connectors.

Fasten 4 Screws (Part F) with hex key.

If securing the whole unit to the floor, use hardware through 4 corner holes to fix the base.

Still have questions? No worries. If you’re confused during any step, just call the number located at the bottom of the Instruction pages. Our friendly representative will be more than happy to assist you.
1. Before starting, measure and calculate the minimum distance between 2 TVs while hanging on FLTBSPTBBK, without interfering with each other.

NOTE:
(1) FLTBSPTBBK can hold dual flat TVs up to 70”, depending on different layouts and orientation.
(2) TVs can not be rotated while 2 TVs are hung on the stand at the same time.
(3) Image on the right shows 2 same size TVs, which the height is the minimum distance required. STEP 1. must be done if hanging 2 different size TVs, or hanging any 2 TVs at different orientations.

2. Avoid fastening Extrusions at the joint area of 2 Tubes, where screws could interfere with the Extrusions.

* TIPS: Adjust Extrusion up and down as needed for desired result.

3. Hang the lower TV first, then the upper one. It could be difficult to hang the lower TV last as there might not be enough room.

* TIPS:
It is easier to accomplish this task by increasing the gas between 2 TVs.
Bracket mounted on TV can be adjusted up and down to best fit and locate both TVs on the stand.
