**WARNING:**

PLEASE CHARGE THE PROJECTOR EVERY 3 MONTHS TO MAINTAIN BATTERY LIFE
Components of Projector

1. 3.5mm earphone jack
2. Standard USB 5V/1A power output
3. HDMI signal input port
4. Reset button
5. Micro USB 5V/2.4A power input
6. Optical Lens
7. Volume up
8. Volume down
9. Power switch
10. Backlit Battery Indicator
11. Focusing wheel
Specification

Product dimensions: 98 * 98 * 21.5mm
Brightness of projection: 50 Lumens
Projection image size (recommended): 30" ~ 100"
Projection distance (recommended): 0.8m ~ 2.6m
Contrast: 1000:1
Resolution: 854*480 (WVGA)
Screen aspect ratio: 16:9
Charger specification: Micro USB 5V/2.4A
Built-in battery: 3.7V/3400mA
Projection time: >1.5hours
Build-in loudspeaker: two 1-Watt loudspeakers
Instruction Manual

• Charging The Projector
  The Projector should be charged with the provided AC Adapter.

  When the LED Indicator lights on in White and flashes, the Projector is currently charging. Each LED light stands for 25% power, when all the 4 LED lights are on, the Projector is fully charged.
  IMPORTANT: Fully charging the internal battery of the Projector before first use (about 3 to 5 hours). The approximate run–time is 2 hours.

  Only one LED light is on and flashes means low power. Use the provided AC Adapter to charge your Projector. Otherwise, the Projector will automatically shut down when the power is too low.

• Set Up
  Connect the Projector with the provided AC adapter & USB charging cable, and plug the other end of the charging cable into an electrical outlet.

  Connect one end of the HDMI cable (provided) to the HDMI port and the other end to your device.
  Note: You may need an adapter to connect your device to the HDMI cable.
  IMPORTANT: Apple® devices require an Apple Digital AV Adapter (sold separately) for HDMI use.
  For the other devices, check the manufacturer's instructions. Additional adapter specialized to your device may be required(e.g. Micro/Mini HDMI).

  Connect an external speaker to the 3.5mm audio output jack, if desired.
• Powering Up And Viewing Media
  
  Turn on the Projector by pressing the Power Switch to “on” for 3–5 seconds.

  Choose the media that you want to view from the menu on your device and
  play it as usual.

  The Projector can display media just almost everywhere! However, for the best
  viewing quality, we suggest you find a light-colored wall (preferably white and
  smooth) and place the Projector with its lens facing the location. The size of
  the picture can be adjusted by just moving the projector towards and away
  from the wall, which is up to 100”. Dimming room lights will also add to viewing
  quality.

  Note: If you are using one of the following devices, you can see your device’s
  screen projected.
  iPad 3
  iPad 2
  Apple laptops with display port to HDMI adapter
  PC laptops with type A HDMI port

• Adjusting Volume
  
  The volume of your video can be adjusted by pressing the Volume “+” “-” key
  on the side of the Projector.

• Adjusting Focus
  
  Simply roll the Focus Wheel on the projector up and down to fine-tune the
  picture.
• Caution

DO NOT BLOCK THE AIRFLOW CHANNELS ON THE SIDES OF YOUR PROJECTOR. DOING SO MAY RESULT IN OVERHEATING AND DAMAGE TO THE UNIT.

• Charging Your Device With The Projector

The Projector can also work as a back–up battery for your smart phones.

Connect your device to the fully–charged Projector with a USB cable.

You can see if it's charging or not from your phone's screen and when it's fully charged.
Important Safety Instructions

All of the safety and operation instructions should be read, adhered to and followed before the unit is operated. If damage is caused by failure to follow the instructions, the warranty does not apply.

- Caution
  TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER. THERE ARE NO SERVICEABLE PARTS INSIDE.
  TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS UNIT TO RAIN OR MOISTURE.

  The lightning flash with arrow–head symbol within an equilateral triangle is intended to alert the user to the presence of uninsulated “dangerous voltage” within the unit's enclosure that may be of sufficient magnitude to constitute a risk of electric shock.

  The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (service) instructions in the literature accompanying the unit.

- Danger
  To reduce the risk of electric shock, burns, fire or injury:
  Do not use the unit while bathing or in a shower.
  Do not place or store the unit in some places where it can fall or be pulled into a tub or sink.
Do not place, drop or submerge the unit in water or other liquids. Do not touch a unit that has fallen into water. Unplug it immediately. Caution should be taken so that objects do not fall and liquids are not spilled over the unit.

- Caution
  Close supervision is necessary when this appliance/product is used by or near children or the mentally disabled individuals.

Use this unit only for its intended usages as described in this manual.

Unplug this unit during lightning storms or without using for a long period of time.

Never drop or insert an object into any openings of the unit.

Protect the adapter cord from being walked on or pinched, especially at plug outlets, convenience receptacles and the point where it exits the unit.

Do not allow adapter cord to touch hot surfaces. Wrap cord loosely around the unit when stored.

The unit should be placed away from direct sunlight or heat sources such as radiators, electric heaters, heat registers, stoves, or other units (including amplifiers). Avoid placing the unit on top of any stereo equipment that radiates heat.

Do not block the air openings of the unit with materials such as clothing, plastic bags or papers, or place it on a soft surface such as a bed or couch, where the air openings may be blocked.
Do not overload electrical outlet. Use only the power source as indicated.

Do not carry this unit by cord or use cord as handle.

Do not operate this unit if it has a damaged cord or plug; Or, if it is not working properly, or damaged, or dropped into water. If the unit's power supply cord or plug is damaged, do not attempt to fix it by yourself.

To avoid the risk of an electric shock, do not disassemble or attempt to repair the unit. Incorrect repair can cause risk of an electric shock or injury to people when the unit is in use.

Do not operate in the presence of explosive and/or flammable fumes.

Do not remove the plug from the socket by pulling the power cord.

- Warning
  THIS PRODUCT CONTAINS A RECHARGEABLE BATTERY

Do not store this product under high temperatures, damp areas or under direct sunlight.

No disassembling the product.

No dispose of the product in fire or water, which may result in explosion and/or injury.
Keep the product beyond the reach of children.

Do not touch the product with damp hands.

Dispose of the product properly.

The product should not be discarded with ordinary household waste.

Contact your local recycling center for proper disposal.
Troubleshooting

- Q. The Projector will not display the video on the wall.
  A. Recharge your device's battery. Also, check if the HDMI cable is fully inserted into the Projector and your device.

- Q. The video showing on my wall is blurry.
  A. Adjust the Focus Wheel on the Projector to fine-tune the picture. It may also depend on the surface on which you are attempting to show your video. Try moving to a location with a smoother wall surface.

- Q. I cannot get my device worked at all with the Projector and its battery is fully charged.
  A. Make sure the cables are inserted into the correct ports and test connections.

- Q. No signal—I am getting no input from my device.
  A. Make sure your device is on and fully charged.
