1. Thread the power cord into one of the two openings on the back of the unit, depending on which side you want the cord to exit through.

2. Using the provided key open the unit by unlocking the lock and tilting the unit back. Plug the power cord into the back of the charger.
3. Plug in the USB Cables to the hub then run the cables over the divider in the cutouts. Position the cables so they fall into the cutouts when the unit is closed.

4. In order to attach dividers put the hooks into the slots in the back of the unit first then slide down into the openings on the bottom shelf.
